Memorandum: COVID-19 update

Tuesday, May 26, 2020

During this trying time Central Alabama Wellness is staying true to our mission of service to our communities by being open and available to help those in need during this difficult time through individual therapy, group therapy, and psychiatric services. We are here for you. We are encouraging all our patients to use our access line to call in for appointments (205-651-0077).

When choosing to come into any of our locations for therapy or psychiatric services, please be advised that when you arrive someone will greet you at the door and perform a COVID-19 screening and temperature check. If negative for the screen and normal temperature, you can enter and receive services. All our lobbies and offices have been arranged and are being cleaned and sanitized throughout the day per the recommendations made by the CDC and Governor Ivey.

While it isn't ordinarily available, for now in addition to our onsite locations you can request a telephonic service that may include videoconferencing or a session from your home. For more information please call the access to care number, choose the location you usually visit and make an appointment with the administrative staff at that location for individual, family, or psychiatric services during normal operation hours, or make use of the after-hours services.

Live Life Well
